

Workshop Management System

PREPARED FOR

Mini Project - BCA Semester 6

PREPARED BY

Nishant Jadhav

JUN 07, 2022

Acknowledgment

I sincerely feel that the credit of the project work cannot be narrowed down to only me. This mini project work is an integrated effort of all self-study from Online Forums, YouTube tutorials, Official Docs, StackOverflow, and all those concerned, by whose cooperation and practical guidance; I achieved its completion.

It is a curriculum to undergo project work in any system. I preferred the **“WORKSHOP MANAGEMENT SYSTEM”** at Naranlala College, Navsari.

I would like to take this opportunity to express my gratitude to all faculty members of the computer department and special thanks to Mrs. Neha Parmar.

yours truly,

NISHANT JADHAV

1. Introduction

1.1 Project Introduction

- This web application enables its users a new door by an intuitive way by which they can get the course details, register and attend the workshop from the comfort of their home.
- This web application will be a boon for the people who want to host new workshop and want other people to gain from their teachings.
- For teachers, they can request password details, for idle users they can just register the colleague will get back to you.
- After successful registration, before seats get full, the learners will get email for Zoom meetings or in workshop the location, etc.

1.2 Project Aim

- Provides new skills to be learned from comfort of the home, at suitable time.
- Access current running workshops.
- Reduce cost for offline and tedious process of hosting such workshops.
- Facility for admin to manage Create, Read, Update, Delete permissions for the workshops.
- Other users will have Read permissions.

1.3 Scope

- This web application is perfect suitable for hosting new workshops, managing them and
- Visitor can send feedback or queries via contact us page.
- Admin can manage workshops with CRUD operations.
